

# Construction Litigation

When construction challenges arise, you need a team that understands both the legal landscape and the realities of the industry. BD&P's Construction Group helps clients across Canada manage risk, resolve disputes, and move projects forward with confidence.

## Your Projects Deserve More Than Legal Advice – They Deserve Practical Solutions

### Solutions for Every Stage of Your Project

From project planning to dispute resolution, clients rely on us at every stage of the construction cycle. We advise on contracts, procurement, health and safety, and risk management. When issues escalate, we handle delays, productivity losses, lien enforcement, warranty claims, surety matters, and insurance disputes. Whether through negotiation, mediation, arbitration, or litigation, our focus is always on practical outcomes that protect your investment and move projects forward.
